Beggs is situated on the Frisco railroad, 30 miles southwest of Tulsa in the center of one of the most promising oil districts. It is adjacent to six active pools and only one mile west of the celebrated Chism field.

It is a thriving business center with a population of 2,000 people. The influx of people during the past few months has been far beyond the normal growth of the town and hence new enterprises are springing up rapidly to meet the extraordinary demands made upon the facilities of the town.

A wide-awake commercial club has encouraged home capital to care for the immediate needs but foreign capital is invited to investigate the opportunities for more permanent and extended investment.

Beggs has a regular patronage from one of the most fertile agricultural sections in Oklahoma and its normal shipment of cotton, cattle and other agricultural products exceeds 2 million dollars annually.

Its four gins bale from four to six thousand bales of cotton each season.

Hence capital may rest assured that our natural resources outside the oil and gas business insures a permanent and increasing patronage for many enterprises not included in our present commercial activities.

The three hotels are unable to care for the public and one or more hotels must be erected at once.

The garages and repair shops are overcrowded and must be doubled in capacity or new ones erected.

Carpenters and skilled workmen are needed to complete this building program.

The following substantial brick and stone buildings are already being built; a large supply and hardware building, a hardware and rooming house combined, Baptist church, large general merchandise store. Other buildings are being planned for in the near future.

The town especially needs an electric and ice plant and will encourage capital to take up the proposition at once.

As an inducement to homeseekers the Board of Education has called an election for the purpose of making a loan of \$60,000 for the erection of a new high school building.

Twenty-five thousand dollars will be expended for more permanent streets at once.

At the present rate of increase Beggs will be a town of more than 3,000 people within a year.

Professional men, skilled workmen, homeseekers and investors are invited to investigate the possibilities and advantages first hand.

An active secretary for the commercial club has been secured at good salary and will be on the ground soon to cooperate with those seeking further information concerning this promising little town.
